EDUCATION

University of Florida - Gainesville, FL

Aug 2024 - Dec 2027

B.S in Industrial & System Engineering

GPA: 3.94/4.00

- **Honors:** Dean's List (Fall 2024 - Spring 2025), College of Engineering & UFIC Study Abroad Scholarship
- **Relevant Coursework:** Data Analytics, Engineering Stats, Operations Research, Product Management, Business Admin

WORK EXPERIENCES

Product & Web Manager / Digital Growth Lead, *Variantz* - Singapore

May 2025 - Oct 2025

- **Led 8-member intern team** to execute product launches, digital campaigns, and in-store displays, successfully managing end-to-end product, web, and growth systems across **2 production websites** and **50+ SKUs** in fast-paced environment
- **Increased 30% user satisfaction** by redesigning responsive UI&UX (desktop/tablet/mobile) and rewriting pages content
- **Boasted conversion rate by 15%** by building scalable, AI-assisted product content pipelines (visuals, copy, metadata)
- **Increased 400% in web traffic** by leading subscription-focused digital campaigns using SEO, email automation, and social media marketing and accelerating strategic B2B-to-B2C transition
- Launched the website, social media and brand foundation for sub-brand APLG from concept to market-ready

E-commerce Analyst & Operator, Independent (eBay, Etsy, TikTok)

May 2024 - Present

- Analyze viral trends and market data to **identify 10+ new product weekly**, **negotiate with 15+ suppliers** for optimal pricing and terms, and **create 40+ marketing assets (images and videos)** to drive growth and customer engagement
- Collaborated with cross-functional stakeholders to execute product launches and manage end-to-end lifecycle, achieving **25% monthly growth** in sales and **5-star ratings** of **10+ stores** across platforms
- Defined product strategy across **100+ SKUs** using market insights, competitive analysis, and user behavior data to set goals and prioritize roadmap, **improving \$5k+ profit** through customer-centric approach
- **Reduced manual workflows by 60%:** Developed automated systems using quantitative methods to scale operations

LEADERSHIP EXPERIENCES

President, UF Chinese Student Association (UFCSA)

Aug 2024 - Present

- Elected to **built and led team of 40+ members across 5 committees** (Event, Operation, Media, Outreach, Tech), **mentoring 8 committee heads** in weekly meetings and delegating responsibilities across **5 concurrent projects**
- **Increasing operational efficiency by 40%:** Spearheaded organizational transformation by restructuring committee responsibilities and member role allocation, **boosting average event attendance by 200%**
- **Increased member participation by 100% by launching and managing 5 new initiatives** including social media presence across **6 platforms (2,800+ followers)**, developing club website with **800+ monthly visits**, inter-club collaborations, large-scale cultural events, and monthly social activities
- **Managed \$10K+ annual budget** by planning and **executing 5 major events** each attracting **500+ attendees**, while **reducing per-event costs by 15%** through strategic vendor negotiations with **10+ local businesses and sponsors**

PROJECTS

Interactive 3D AI-Powered Portfolio Website (jijunnie.com)

Oct 2025 - Dec 2025

- Designed and Built website end-to-end featuring **chatbot interface**, **VisionOS design**, implementing **8+ interactive 3D components** to showcase project and personality through immersive UX

Cross-Platform E-commerce Analytics Application

Jan 2026 - Present

- Developing unified full-stack web application using Javascript and React, that aggregates real-time market data from **5+ e-commerce platforms**, provides actionable insights through interactive dashboards

PROFESSIONAL SKILLS

Programming & Data: Expert in JavaScript & Python; Familiar with Java, SQL, Matlab & R

Web & Systems: Proficient in HTML/CSS, SEO/SEM, Data Analytics (Certified), Wix, React, Vite, Three.js, Cloudflare

Tools: SolidWorks (Certified), Google Workspace, Microsoft Office Suite, Canva, Meitu, Capcut, Asana, Tableau, Cursor AI, Blender, Spline,

Product & Business: Digital Marketing (Certified), BI (Certified), Project Management (Certified), ad photo & video editing/production, AI-assisted content & visuals creation

- **Scholarships:** Herbert Wertheim Engineering Scholarship & UFIC Summer Study Abroad Scholarship
- **Relevant Coursework:** Data Analytics, Engineering Stats, Operations Research, System Design, Calculus 1-3

PROFESSIONAL EXPERIENCES

Product Designer & UX Lead, *Variantz* - Singapore

May 2025 - Oct 2025

- **Promoted from intern** to own end-to-end product strategy, roadmap execution, and cross-functional team leadership across **2 product platforms** and **50+ SKUs**
- Designed and prototyped user experiences across 2 responsive web platforms (desktop/tablet/mobile) serving 50+ SKUs, conducting user research to solve complex product problems and improve satisfaction by 30%
- Collaborated with cross-functional teams (engineering, marketing) to craft thoughtful experiences, translating user needs into visually polished interfaces that increased conversion rates by 15%
- Applied design thinking and human-centered approaches to re-architect platform UI/UX, creating intuitive user flows and interaction patterns that drove 400% growth in user engagement
- Led design critiques with 8-member team to iterate on visual designs, prototype solutions, and work closely with engineering to implement final product experiences

UX Designer & Product Strategist, Independent E-Commerce (eBay, Etsy, TikTok)

May 2024 - Present

- Designed user experiences across 100+ product listings on multiple platforms, conducting user research and analyzing behavior data to build experiences users love, achieving 5-star ratings and 40% repeat purchase rate
- Applied problem-solving skills to create seamless customer journeys from product discovery to checkout, optimizing mobile and web experiences that generated \$5k+ profit
- Prototyped and tested design solutions using human-centered methods, iterating based on user feedback and metrics to improve conversion funnels by 25% month-over-month
- Crafted visual designs and product positioning that balance aesthetic appeal with functional user needs

LEADERSHIP EXPERIENCES

President, UF Chinese Student Association (UFCSA)

Aug 2024 - Present

- Elected to **lead 6 committees (35+ members)** overseeing operations, communications, marketing, events, and finance
- **Strategically designed and implemented revolutionary upgrade in club history**, transforming an inactive club to highly engaged, collaborative community for international students
- **Launched and managed multiple new initiatives:** social media presence in 5 platforms, multifunctional club website, inter-club collaborations, and a signature large-scale cultural event
- Planned and executed **5 major events with 500+ attendees each**, overseeing logistics, budgeting and risk management
- Introduced monthly social and professional activities, **↑ 100% member participation**

Head Intern Leader, *Merch Committee*, UF Society of Asian Scientists and Engineers (SASE)

Aug 2024 - Dec 2025

- Collaborated with 6-member team to design and execute merchandise operations, **raising over \$1k+**
- Applied project management skills to coordinate logistics, budgeting, and quality control for deliverables

PROFESSIONAL SKILLS

Design Tools & Prototyping: Figma, Canva, Spline, Blender, HTML/CSS, JavaScript, React, Three.js, Adobe Creative Suite (basic), Meitu, Capcut

UX/UI & Design Methods: User Research, Design Thinking, Human-Centered Design, User Flow Mapping, Wireframing, Prototyping, Visual Design, Interaction Design, Responsive Design (mobile/web), Design Critiques

Technical & Analytics: JavaScript, Python, HTML/CSS, SQL, Google Analytics, Tableau, Data Visualization, A/B Testing, User Behavior Analysis, Basic understanding of blockchain/crypto technologies

Dear Hiring Manager,

I'm writing to express my strong interest in the Product Development Internship at Coke Florida's North Region. I discovered this opportunity through your company website and was immediately drawn to joining a US Best Managed Company known for operational excellence and innovation in the beverage industry. As an Industrial and Systems Engineering student at the University of Florida, I'm eager to apply my skills in process optimization and data-driven decision making to support Coke Florida's product development initiatives.

My industrial engineering background positions me to contribute immediately to your product development process. Having optimized platforms managing 100+ SKUs at Variantz, I can help Coke Florida streamline product portfolio management and identify efficiency opportunities across your development pipeline. My experience improving user satisfaction by 30% through strategic packaging implementation translates directly to supporting consumer testing initiatives and translating customer feedback into actionable product improvements. I can assist your team in analyzing market data, evaluating product specifications against operational constraints, and ensuring new beverage concepts align with both consumer preferences and manufacturing capabilities.

I'm available for the full duration of the summer internship and would welcome the opportunity to discuss how I can support Coke Florida's product innovation goals. Thank you for considering my application.

Sincerely,

University of Florida

Jijun Nie

Dear Hiring Manager,

I'm genuinely excited about this Product Design internship at Coinbase. This opportunity aligns perfectly with my passion for crafting thoughtful user experiences that solve complex, ambiguous problems. I want to work alongside high-caliber designers and cross-functional teams who demand excellence, helping build the emerging onchain platform that will define how billions of people interact with the crypto economy.

I'm committed to making the most of this opportunity. I promise to bring dedication, a commitment to personal growth, and positive energy to every design challenge. I'll engage deeply in design critiques, actively seek feedback to keep leveling up, and work closely with engineering to turn design ideas into tangible user experiences. Just as I redesigned platforms serving 100+ SKUs at Variantz—improving user satisfaction by 30%—and led 35+ members at UFCSA through design thinking approaches, I'm confident I'll bring that same level of excellence to Coinbase.

I'm available to start early and would be happy to begin with an unpaid trial period to adapt to Coinbase's design workflows and team dynamics. I want to hit the ground running when the official internship begins so I can contribute meaningfully from day one. I thrive in intense, collaborative environments where pressure brings out my best work. I approach problems with curiosity and enthusiasm, using human-centered methods to build experiences that users love.

I'm available for the full 12-week summer internship in San Francisco, Thank you for considering my application.

Sincerely,

University of Florida

Imagination into Reality

Generated by Jimeng.ai

Way back in 1726, an author named Jonathan Swift wrote a book called Gulliver's Travels and accidentally predicted something we use every day now – AI writing tools like ChatGPT. In the book, Gulliver visits this fictional city called Lagado where a professor shows him his giant wooden machine that's supposed to write book automatically. Swift describes it as a machine that could let “the most ignorant person, at a reasonable charge, and with a little bodily labor, might write books in philosophy, poetry, politics, laws, mathematics, and theology, without the least assistance from genius or study” (Pickover 31). Based on the context above, isn't it sounds like something we are widely using today?

The ideas behind ChatGPT and similar AI writing tools didn't pop out of nowhere in the 2020s. These concepts can be traced back in history through people's wild imagination and creative thinking. Swift's imaginary machine from 1726 is a proof that humans have been dreaming about automated writing or literally centuries. Even before the computer existed, people were already wondering: "what if a machine could do the thinking for us?" The Lagado machine's wooden tiles shuffling the card with words around to form sentence in the past that was imagination in the past now turns into an algorithm predicting which words next based on billions of existing data or example from the internet. Technology changed dramatically, but the concept stays the same. This shows that innovation doesn't happen in a vacuum, today's AI developers are basically building what creative thinkers like Swift imagined hundreds of years ago. Similarly, the concepts that seems science fictional today coming from people's mind might be realistic in the future.

Mini-blurb:

In 1726, Swift invented a word-shuffling machine as a joke about lazy writing. 300 years later, we call it Artificial Intelligence and use it daily. Imagination turned into reality.

EDUCATION

University of Florida - Gainesville, FL

Aug 2024 - Dec 2027

B.S in Industrial & System Engineering

- **Cumulative GPA:** 3.94/4.00 | **Honors:** College of Engineering Dean's List (Fall 2024 - Spring 2025)
- **Scholarships:** Herbert Wertheim Engineering Scholarship & UFIC Summer Study Abroad Scholarship
- **Relevant Coursework:** Data Analytics, Engineering Stats, Operations Research, Process Optimization

WORK EXPERIENCES

Product Manager, Variantz - Singapore

May 2025 - Oct 2025

- Promoted from intern to Product & Web Manager for strong initiatives, owning end-to-end product, web, and growth systems across **2 production websites and 50+ SKUs** working in fast-paced environment.
- **Leader of 8 interns:** Appointed by CEO to direct across product launches, digital media, and in-store display execution
- **+30% user satisfaction:** Re-architected responsive web platform (desktop/tablet/mobile), improving UI & UX
- **Increased 400% in web traffic:** Led subscription-focused digital campaigns using SEO, email automation, and social media marketing and accelerating strategic B2B-to-B2C transition
- **Increasing conversion rate by 15%:** Built scalable, AI-assisted product content pipelines (visuals, copy, metadata)
- Launched the website, social media and brand foundation for sub-brand APLG from concept to market-ready

E-commerce Analyst & Operator, Independent (eBay, Etsy, TikTok)

May 2024 - Present

- Analyze viral trends and market data to **identify 10+ new product weekly, negotiate with 15+ suppliers** for optimal pricing and terms, and **create 40+ marketing assets (images and videos)** to drive growth and customer engagement
- Collaborated with cross-functional stakeholders to execute product launches and manage end-to-end lifecycle, achieving **25% monthly growth** and **5-star ratings of 10+ stores** across platforms
- Defined product strategy across **100+ SKUs** using market insights, competitive analysis, and user behavior data to set goals and prioritize roadmap, **improving \$5k+ profit** through customer-centric approach
- **Reduced manual workflows by 60%:** Developed automated systems using quantitative methods to scale operations

Web Application Developer, Independent

Oct 2025 - Present

- Designed and built **2 AI-driven websites and applications** end-to-end, translating user centered concepts into production-ready features using JavaScript, HTML, CSS, and three.js.
- Created a fully interactive **3D AI-powered portfolio website** showcasing projects and personality (**jijunnie.com**)
- Designing a unified cross-platform commerce web application that aggregates market signals, analyzes demand and competition, identifies suppliers, and executes listings and sales within a single system.

LEADERSHIP EXPERIENCES

President, UF Chinese Student Association (UFCSA)

Aug 2024 - Present

- Elected to **lead 6 committees (35+ members)** overseeing operations, communications, marketing, events, and finance
- Strategically designed and **implemented organizational transformation**, turning an inactive club to highly engaged, collaborative community for international students
- **Launched and managed 5 new initiatives:** social media presence in 6 platforms, multifunctional club website, inter-club collaborations, and a large-scale cultural event, monthly social activities, **↑ 100% member participation**
- Planned and executed **5 major events with 500+ attendees each**, overseeing logistics, budgeting and risk management

Head Intern Leader, Merch Committee, UF Society of Asian Scientists and Engineers (SASE)

Aug 2024 - Dec 2025

- Collaborated with 6-member team to design and execute merchandise operations, **raising over \$1k+**
- Applied project management skills to coordinate logistics, budgeting, and quality control for **5 fundraising events**

PROFESSIONAL SKILLS

Programming & Data: Expert in JavaScript & Python; Familiar with Java, SQL, Matlab & R

Web & Systems: Proficient in HTML/CSS, SEO/SEM, Data Analytics (Certified), Wix, React, Vite, Three.js, Cloudflare

Tools: SolidWorks (Certified), Google Workspace, Microsoft Office Suite, Canva, Meitu, Capcut, Asana, Tableau, Cursor AI, Blender, Spline,

Product & Business: Digital Marketing (Certified), BI (Certified), Project Management (Certified), ad photo & video editing/production, AI-assisted content & visuals creation
